3. Accounting changes

a) New accounting standards issued but not yet effective

The following new standards, new interpretations and amendments to standards and interpretations have been issued but are not effective until financial years beginning on or after January 1, 2018 and have not been early adopted. Pronouncements that are not applicable to the Group have been excluded from those described below.

i) Accounting standards effective on or after January 1, 2018:

- A. The International Accounting Standards Board (“IASB”) has issued a new standard for the recognition of revenue, IFRS 15 – *Revenue from Contracts*. This standard will replace IAS 18 which covers contracts for goods and services and IAS 11 which covers construction contracts. The new standard is based on the principle that revenue is recognized when control of a good or service transfers to a customer – so the notion of control replaces the existing notion of risks and rewards. The standard permits a modified retrospective approach for the adoption. Under this approach, entities recognize transitional adjustments in retained earnings on the date of initial application (i.e. January 1, 2018), without restating the comparative period. They will only need to apply the new rules to contracts that are not completed as of the date of initial application. The standard is effective for annual reporting periods beginning on or after January 1, 2018. Early adoption is permitted. The Corporation has evaluated the new standard and does not anticipate any impact from the adoption on its results of operations, financial position, and disclosures.
- B. IFRS 9 addresses the classification, measurement and derecognition of financial assets and financial liabilities and introduces new rules for hedge accounting. In July 2014, the IASB made further changes to the classification and measurement rules and also introduced a new impairment model. These latest amendments now complete the new financial instruments standard. IFRS 9 is effective for annual periods beginning on or after January 1, 2018 with early adoption permitted. The Corporation has evaluated the change in the standard and does not anticipate any impact from the adoption but will continue to monitor as the adoption period approaches.
- C. In January 2016, the IASB issued IFRS 16 – *Leases* which establishes the principles that an entity should use to determine the recognition, measurement, presentation and disclosure of leases for both parties to a contract, i.e. the customer (‘lessee’) and the supplier (‘lessor’). IFRS 16 replaces the previous leases Standard, IAS 17, *Leases*, and related Interpretations. IFRS 16 is effective from January 1, 2019 though a company can choose to apply IFRS 16 before that date but only in conjunction with IFRS 15 *Revenue from Contracts with Customers*. The Corporation has evaluated the new standard and does not anticipate any impact from the adoption of this standard but will continue to monitor as the adoption period approaches.
- D. In June 2016, the IASB issued amendments to IFRS 2, clarifying how to account for certain types of share-based payment transactions, including the accounting for the effects of vesting and non-

vesting conditions on the measurement of cash-settled share-based payments, accounting for share-based payment transactions with a net settlement feature for withholding tax obligations, and accounting for modifications to the terms and conditions of a share-based payment that changes the classification of the share-based payment transaction from cash-settled to equity-settled. The IFRS 2 amendments are effective for annual periods beginning on or after January 1, 2018. The Company is in the process of evaluating the impact of adopting these amendments to its consolidated financial statements.

The Corporation receives incentive tax credits for qualifying expenditures at the Çöpler Gold Mine. Application of these tax credits reduces income tax expense in the current period and offsets current and future cash tax payments.

The facility has no mandatory hedging, has an 8-year term, and interest rates of LIBOR plus 3.5% to 3.95%. As of March 31, 2017, the Corporation has no outstanding debt balances that are owed for credit facilities or debt arrangements. The costs to establish and finalize the financing facility (including syndicate bank fees, legal and accounting fees, investment and registration fees, and other agency fees) was \$10.4 million, which will be amortized over the life of the loan when the finance facility is drawn (see Note 9).

i) Restricted share unit plan

On June 2, 2011, the Corporation adopted two new RSU plans, the 2011 RSU plan and the Non-Executive Director (NED) RSU Plan (collectively, the "Alacer RSU Plans"). Each RSU becomes payable as they vest over their lives, typically at three years, are subject to normal performance criteria, and entitles participants to receive one common share of the Corporation. Alternatively, the Corporation, at its discretion, may elect to satisfy all or part of its payment obligation in cash.

The following table summarizes activity for the years through March 31:

ii) Performance share unit plan

In August 2014, the Board of Directors approved a performance share unit ("PSU") plan (the "PSU Plan") for senior employees and officers. Each PSU granted entitles the participant, at the end of the applicable performance period (typically three years), to receive a payment in cash for the equivalent value of one Share provided: (i) the participant continues to be employed or engaged by the Corporation or any of its affiliates, and (ii) all other terms and conditions of the grant have been satisfied, including the performance metrics associated with each PSU. The grant of a PSU does not

iii) Deferred share unit plan

In May 2009, shareholders approved a deferred share unit (“DSU”) plan (the “DSU Plan”) pursuant to which directors of the Corporation may be granted DSUs. On June 2, 2011, shareholders approved an amendment to the DSU Plan stating no additional grants of units would be made under the DSU Plan after June 2, 2011, and the DSU Plan would remain in effect until all DSUs granted under the DSU Plan have been redeemed. In 2015, a new DSU plan was approved. DSUs are valued based on the share price and settled in cash when the director’s term concludes.

19. Profit (loss) per share

Basic profit (loss) per share is calculated by dividing the profit (loss) attributable to equity holders of the Corporation by the weighted average number of ordinary shares outstanding during the period.

Diluted profit (loss) per share is calculated using the treasury method, except the if-converted method is used in assessing the dilution impact of convertible instruments (until maturity) and options. The treasury method, which assumes that outstanding stock options with an average exercise price below the market price of the underlying shares, is exercised and the assumed proceeds are used to repurchase common shares of the Corporation at the average market price of the common shares for the period. The if-converted method assumes that all convertible instruments (until maturity) and options have been converted in determining fully diluted profit (loss) per share if they are in-the-money, except where such conversion would be anti-dilutive.
