

## Supporting Drill Information to Alacer Gold Announcement

This document provides supporting drill collar locations for the Gediktepe drilling program referenced in the announcement “Alacer Gold Announces the Results of the Updated Prefeasibility Study for the Gediktepe Project”, dated April 3, 2019.

Drill collar locations are surveyed in UTM European Zone 35, in units of meters. Diamond core drilling was dominantly started with PQ core size with deeper holes HQ. HQ is 63.5mm and PQ is 85mm in diameter. For RC drilling, a face sampling bit (121 mm) was used.
